General Election & Attitudes Towards Brexit Opinion Poll

January 2019

Methodology and Weighting

- ✓ RED C interviewed a random sample of 1000 adults aged 18+ by telephone between the 17th-24th January 2019.
- ✓ A random digit dial (RDD) method is used to ensure a random selection process of households to be included – this also ensures that ex-directory households are covered.
- ✓ Half of the sample are interviewed using an RDD landline sample, with the other half conducted using an RDD mobile phone sample, this ensures 98% coverage of the population reaching landline only households, mobile only households and those with both a landline and a mobile.
- ✓ Interviews were conducted across the country and the results weighted to the profile of all adults. A further past vote weighting is included that takes the recall for how people voted at the last election, compares this to the actual results and weights the data between the two.
- ✓ Vote intention results are weighted based on turnout, including both how likely each respondent is to actually go and vote on a 10 point scale, where 1 is not at all likely and 10 is very likely, as well as whether or not they voted in the last general election.
- ✓ In all respects the poll was completed to the opinion polling guidelines set out by both ESOMAR and AIMRO.

Brexit

Attitudes towards Brexit

The Irish Government should refuse to put up the border infrastructure if there is a hard Brexit.

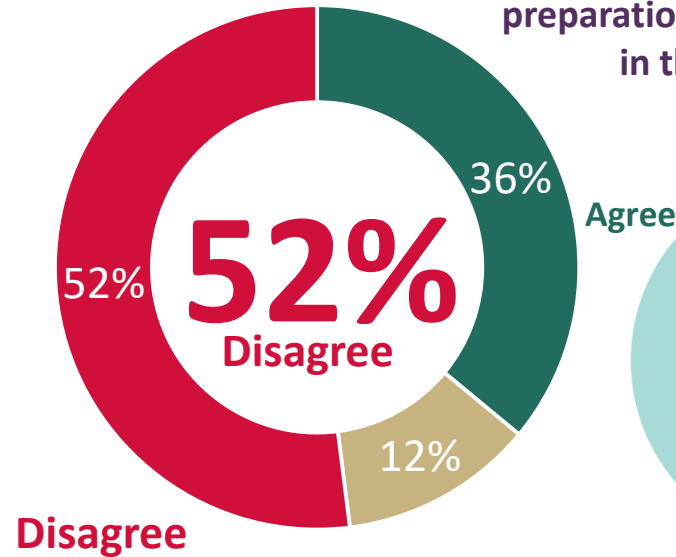

The Irish Government should drop the backstop- which is the guarantee of no hard border- from the Brexit withdrawal deal to help Prime Minister Theresa May get the deal through the House of Commons

The vote by the UK for Brexit makes a united Ireland more likely

The Irish Government have made sufficient preparations to protect Ireland's economy in the event of a hard Brexit
